

# **10 000 kWh energy storage equipment**

## Overview

---

What is the 100 MW energy storage system?

The 100 MW system is an energy storage installation that will provide critical capacity to meet local reliability needs in the area, while helping California meet its environmental goals.

What is a 1 MWh energy storage system?

A 1 MWh energy storage system has wide applicability and can expand capacity by combining multiple units in parallel. It has a good competitive advantage and can also be connected to new energy sources or connected to the grid as a distributed power source of smart grid.

How many MWh of energy storage does GE have?

To date GE has more than 207 MWh of energy storage in operation or in construction globally. This project will relieve pressure on the host country's energy system and provide flexibility when it is most needed to deliver a more balanced, secure energy system and help reduce consumer energy cost.

What is a battery energy storage solution?

A battery energy storage solution offers new application flexibility and unlocks new business value across the energy value chain, from conventional power generation, transmission & distribution, and renewable power, to industrial and commercial sectors.
