

# **100MWh scale gravity energy storage project**

## Overview

---

The Rudong project is the world's first commercial scale deployment of a non-pumped hydro, gravitational energy storage system. What is gravity energy storage system (GESS)?

The 25 MW/100 MWh EVx™ Gravity Energy Storage System (GESS) is a 4-hour duration project being built outside of Shanghai in Rudong, Jiangsu Province, China. The EVx™ is under construction directly adjacent to a wind farm and national grid.

What is the Rudong gravity energy storage system?

The Rudong gravity energy storage system is part of China's Zero-Carbon Parks initiative, and national 30-60 net carbon neutral plan. Its modular design, and recycled materials will help ensure the 100 megawatt-hour gravity battery project remains financially sustainable during its 35-year operating life.

How does gravity energy storage work?

When the national grid calls for the energy, the gravity battery lowers those weights, and generates energy with the electric motor-generators. The Rudong gravity energy storage system is part of China's Zero-Carbon Parks initiative, and national 30-60 net carbon neutral plan.

Will China Tianying build a 100 MWh gravity energy storage project?

A subsidiary company of China Tianying recently announced it formed an agreement with the People's Government of Huailai County to build an additional 100 MWh gravity energy storage project. Energy Vault said it will provide more details on this expansion during the company's second quarter 2023 earnings conference call scheduled for Aug. 8, 2023.
