# 1500v energy storage integrated system

## Overview

---

What is a high-voltage battery management system (BMS)?

These components collectively form the high-voltage part of a BMS, enabling precise monitoring, control, and protection of the high-voltage battery pack in applications like electric vehicles or large-scale energy storage systems.

What is FPR-ess-5015kwh-l-1500v?

The FPR-ESS-5015kWh-L-1500V is perfect for large-scale applications, including grid stabilization, renewable energy integration, and industrial power management. With its advanced technologies, the FPR-ESS-5015kWh-L-1500V ensures optimal performance, safety, and longevity.

What is a stationary battery energy storage system?

The stationary battery energy storage systems feature multi-level short circuit protection at the pack, rack, and container levels. Advanced BMS and sophisticated data algorithms ensure thermal stability across both pack and rack levels. Our systems feature 314Ah battery cells integrated into an IP67-rated battery pack design.

What are high-voltage BMS chipsets used for?

High-Voltage BMS chipset solutions for a wide range of applications to reduce development cost and enable faster time to market. This reference design fits stackable high-voltage battery energy storage systems used in large scale utility solutions, industrial and commercial UPS as well as storage for domestic use.
