

1kv high voltage inverter

Overview

With nominal DC voltage up to 1 kV and maximum power up to 300 kW each, our inverters support a variety of applications including traction drives, grid connections, and island grids. What is a high voltage inverter?

To power motors or other devices, high-voltage inverters convert direct current (DC) from batteries or generators to alternating current (AC). With nominal DC voltage up to 1 kV and maximum power up to 300 kW each, our inverters support a variety of applications including traction drives, grid connections, and island grids.

What is a 1kva solar inverter?

Our 1kVA solar inverter are particularly suitable for locations where there are long power cuts or for those who are worried about their heavy electricity bills. For such locations and peoples, UTL's 1kVA solar inverter can generate up to 30% more power than any other standard solar inverter.

What is a LCOE solar inverter?

This highly efficient inverter is specifically designed to meet the requirements of large commercial and utility-scale solar power plants with the lowest levelized cost of energy (LCOE) investors demand and expect.
