

# 2MW European Solar Container for Mining

## Overview

---

What is a 20 MW solar project?

A 20 MW solar project, paired with 11 MWh of energy storage, will supply sustainable power to the national grid. This project is a crucial step in reducing fossil fuel dependence and improving the country's energy reliability.

Can solar & energy storage help a mining industry?

Whether you're in mining, manufacturing, or any other energy-intensive industry, solar and energy storage offer a path toward a greener future. At Eco Green Energy, we specialize in solar and battery storage solutions for industries like mining.

How can solar power help a gold mine?

In Burkina Faso, a 13 MW solar power system with an energy storage system (ESS) is being implemented for gold mines. The system will help the mines reduce diesel consumption and power their operations with clean, reliable energy. Senegal is another great example.

Why should mining companies use a hybrid energy storage system?

This hybrid solution enables mining companies to store energy during the day and use it during the night or peak demand periods. It's a win-win for both the environment and the bottom line.
