

# **5MWh Mobile Energy Storage Container in Tshinchwali**

## Overview

---

What is a 5MWh battery energy storage system?

As well as reducing energy consumption; the single 5MWh battery energy storage system makes it easier to select the energy storage converter (PCS) and configure the power station.

What is the difference between Zenergy energy storage container and 5MWh?

Zenergy energy storage container is equipped with self-produced 314Ah batteries, and the 5MWh energy storage container is equipped with self-produced 314Ah batteries. Through modular design, it can be flexibly arranged and expanded, and the system is more standardized.

What is Mercury Max 5MWh liquid cooled container?

Mercury MAX 5MWh liquid-cooled container adopts the 1P104S large PACK solution, which increases the energy density by about 20%, effectively optimizing the production process and saving costs; the compact design and reasonable matching of the power of the hydrothermal system can further improve the energy density of the energy storage system.

How long does a 5MWh power plant last?

It is equipped with a BMS with multi-level balancing function to ensure product service life of  $\geq 15$  years. 5MWh large capacity, 339.6kWh/□ modular high energy density design, 35% higher energy density than the previous generation product, can reduce the project base station footprint by more than 40% and 35% of transportation and hoisting costs.
