# 60kW Solar Containerized Solar Power Parameters

## Overview

---

What is a 60 kW solar system?

A 60 kW solar system is a complete PV solar power system that includes solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. These grid-connected solar kits from SunWatts can work for a home or business, with just about everything you need to get the system up and running quickly.

How much space does a 60kW Solar System need?

A 60kW Solar System requires up to 4,300 square feet of space. 60kW or 60 kilowatts is 60,000 watts of DC direct current power. This could provide approximately 7,000 kilowatt hours (kWh) of alternating current (AC) power per month under ideal conditions, assuming at least 5 sun hours per day with the solar array facing South.

Where can I buy a 60 kW solar system?

SunWatts sells 60 kW solar systems for affordable prices. These 60 kW grid-connected solar kits include solar panels, DC-to-AC inverter, rack mounting system, hardware, cabling, permit plans, and instructions. SunWatts offers flat-rate shipping with lift-gate service to continental U.S.

Why should you choose a modular solar power container?

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to your needs. Lower your environmental impact and achieve sustainability objectives by using clean, renewable solar energy.
