

Accra Wind Power System

Overview

NEK is carrying out several wind energy projects in locations in the Greater Accra Region of Ghana between Tema and Ada, consisting of six large-scale wind parks which are ready for construction. When will a wind turbine be installed in Accra?

Construction will start soon, meaning that first wind turbines will deliver energy to the grid in 2024/2025. The project site is located in a very sparsely populated area in the Ningo-Prampram District, around 50 - 60 km east of Accra, between the Accra-Aflao-Road in the north and the Gulf of Guinea in the south.

Where does LCRA buy wind power?

LCRA purchases 51 megawatts of wind power capacity from the Indian Mesa Wind Energy Center in West Texas and 200 megawatts from the Papalote Creek II Wind Farm near the Texas Gulf Coast.

What is global wind power tracker?

Global Wind Power Tracker, a Global Energy Monitor project. Ayitepa wind farm is a wind farm in pre-construction in Ningo-Prampram District, Greater Accra Region, Ghana. The map below shows the exact locations of the wind farm phases:.

When will ayitepa wind farm be built?

While our engineering company started first wind measurements in the region of Greater Accra back in 1998, we initiated the development of the Ayitepa Wind Farm in 2012. Construction will start soon, meaning that first wind turbines will deliver energy to the grid in 2024/2025.
