

# Albania solar Module Project

## Overview

---

How many solar projects are there in Albania?

Albania's Ministry of Infrastructure and Energy has received four applications for solar projects with a total installed capacity of 235 MW. The projects are planned to be built in the country's photovoltaic hub Fier region, the largest of which will be the second largest solar facility in Albania.

Does Albania have solar power?

Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity. France-based Voltalia won a long-term power purchase agreement for the project by winning a state-sponsored auction in 2020.

Will a 100 MW solar power plant be built in Albania?

A company called Euron Solar-PV has submitted an application to the Albanian Ministry of Infrastructure and Energy for the construction of a 100 MW Solar power plant in the villages of Fushe and Povelce, near Fier City. The project is currently in its initial stages and the public has two weeks to submit comments and objections.

Could a photovoltaic unit be the second-biggest in Albania?

A proposed unit in Fier, the country's photovoltaics hub, would be the second-biggest in the country. Solar power accounts for 6% of electricity production in Albania. More than half of the photovoltaic output is from the Karavasta facility, the biggest of its kind in the Western Balkans. It has 140 MW in peak capacity.
