# Algeria solar Energy Storage Combined Frequency Regulation Project

## Overview

---

When will a 300 MW solar power plant be built in Algeria?

The state-owned China State Construction Engineering Corporation (CSCEC) began building a 300 MW solar power plant in Algeria's Oued Province in March 2024 as part of the Solar 1,000 MW program. The project is slated for completion by late 2025 or early 2026.

What is Algeria's solar power supply chain?

The Algerian solar power supply chain grew significantly in the last decade and now seeks to add IPP development, engineering and design capabilities, EPC services, inverters manufacturing, storage solution manufacturing, universal certification expertise, and operations and maintenance services.

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CEREFE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m<sup>2</sup>/year in the north and 2,263 kWh/m<sup>2</sup>/year in the south.

What does the Biskra 300MW solar power plant mean for Algeria?

The launch of the Biskra 300MW Solar Power Plant—the nation's largest photovoltaic (PV) project to date—marks a major step forward in Algeria's renewable energy ambitions.
