Amsterdam New Energy Small Container Line Station

Overview

Will the port of Amsterdam become a green energy port?

"If there is one place where this transition can take shape, it is the Port of Amsterdam. One of our objectives is to strengthen the development of Green Energy Port Amsterdam by increasing the transport of renewable liquids by 25% compared to 2024," Koen Overtoom, CEO of Port of Amsterdam, highlighted.

Will renewable liquids take shape in the port of Amsterdam?

Renewable liquids +25 percent Koen Overtoom: "If the transition can take shape anywhere, it is in the Port of Amsterdam. One of our objectives is to stimulate the build-up of Green Energy Port Amsterdam by increasing transport of renewable liquids by 25 percent compared to 2024.

How will the port of Amsterdam change over the next 4 years?

Port of Amsterdam will continue to do so over the next four years as well. Accelerate transition In its four-year strategy, the port authority reports that it is building a port where renewable energy sources, circular industries and low-emission logistics prevail. A port with a business climate ready for the European climate goals of 2030.

What will the port of Amsterdam look like in 2040?

Furthermore, as explained, the port will also focus on renewable energy sources, circular industries, and low-emission logistics. Koen Overtoom, CEO of Port of Amsterdam, emphasized that by 2040, the port's new contours will be clearly visible, with the necessary infrastructure in place to support the transition.
