What is arc flash protection in a substation?

The main purpose of arc flash protection in a substation is to protect both personnel and equipment from the consequences of an arc fault. Arc flash faults are the most devastating types of faults known in power distribution systems.

What are arc flash faults?

Arc flash faults are the most devastating types of faults known in power distribution systems. They can cause life-threatening injuries as well as severe equipment damage, leading to time-consuming repairs and extended power outages. The reliability of the AQ 100 series is based on our unbeatable experience in the field of arc protection.

How long does an arc flash protection relay take?

The AQ 100 series arc flash protection relays provide trip times of 2.7 ms. When combined with a fast-acting circuit breaker, a total clearing time of 5 to 8 cycles is achieved. Protection schemes can be based solely on an arc light signal or on arc light and overcurrent signals occurring simultaneously.
