## Overview

---

What is battery energy storage system (BESS)?

Introduction Battery Energy Storage Systems (BESS) are a transformative technology that enhances the efficiency and reliability of energy grids by storing electricity and releasing it when needed.

What is Siemens Energy battery energy storage system (BESS)?

Siemens Energy fully integrated Battery Energy Storage System (BESS) combines advanced components like battery systems, inverters, transformers, and medium voltage switchgear with seamless electrical and I&C integration for precise control and management.

What is a Bess system?

Customers rely on these systems to store excess energy produced during periods of low demand or when renewable energy sources, like solar and wind, are generating surplus power. Our grid-scale BESS solutions range from 1 MWh to over 1,000 MWh as both traditional LV and JST's unique HV cascade solution.

How many energy storage containers are in a Bess?

As shown in Fig. 3, the BESS consists of 50 containers, each of which is a sub unit of 1 MW/2 MWh. Each 1 MW/2 MWh energy storage container includes two sets of 500 kW PCS, 2 MWh battery and corresponding battery management system.
