Base station battery pack specifications

Overview

What makes a telecom battery pack compatible with a base station?

Compatibility and Installation Voltage Compatibility: 48V is the standard voltage for telecom base stations, so the battery pack's output voltage must align with base station equipment requirements. **Modular Design**: A modular structure simplifies installation, maintenance, and scalability.

Which battery is best for telecom base station backup power?

Among various battery technologies, Lithium Iron Phosphate (LiFePO4) batteries stand out as the ideal choice for telecom base station backup power due to their high safety, long lifespan, and excellent thermal stability.

What is a 48V 100Ah LiFePO4 battery pack?

Our 48V 100Ah LiFePO4 battery pack, designed specifically for telecom base stations, offers the following features: **High Safety**: Built with premium cells and an advanced BMS for stable and secure operation. **Long Lifespan**: Over 2,000 cycles, significantly reducing replacement and maintenance costs.

What is a Himax battery?

HIMAX, a professional lithium battery brand, is committed to providing high-performance LiFePO4 battery solutions for global customers. Our 48V 100Ah LiFePO4 battery pack, designed specifically for telecom base stations, offers the following features:
