

# Battery Cabinet Contract

## Overview

---

Can a developer supply a battery energy storage system?

In this context, a developer will often seek to enter into a supply agreement for the Battery Energy Storage System ("BESS"), which will then be supplied to the civil works contractor for installation and commissioning.

What is a battery cabinet made of?

The cabinets are made of galvanized steel or aluminium, making them easy to position and providing a long service life. A slide-in racking system allows for easy installation of 19" rackmount style battery modules along with rain protected vents on both sides and on top for passive ventilation.

What kind of batteries can be stored in a rack mount cabinet?

All-in-one design, store the leading brands of 19" rack mount type lithium batteries, inverters and controllers. DC48V powered air conditioner, heat exchanger or TEC coolers are optional, which can cool down the devices installed inside the cabinet. Battery Storage Space based on the battery specification.

Why do battery operators have a floor price in a trading agreement?

While battery operators with a floor price in the trading agreement are guaranteed a minimum gain, their overall revenue split is lower because the market risk gets transferred to the trading party. Agreements containing a floor price typically have shorter tenors as the risk for the trading party increases with longer durations of fixed revenues.
