

# **Battery energy storage plan in Zurich Switzerland**

## Overview

---

What is the future of electricity storage in Switzerland?

One important pillar of this strategy is the further development of electricity storage capacity in Switzerland. In the next years, three large-scale pumped hydro storage power plants will be connected to the grid. The first, the Limmern pumped storage plant (1 GW), should become operational in 2016.

Which energy storage projects have been commissioned in Switzerland?

Axpo commissioned its BESS in February this year while utility Thurplus commissioned a 3MW system in September last year. But Switzerland was the location for one of the largest energy storage projects commissioned in recent years, a 20GWh pumped hydro energy storage (PHES) unit which started operations in June 2022 in the Canton of Valais.

Is MW storage the country's largest battery storage project?

MW Storage is a developer of BESS projects which is also active in the German market, with a 100MW/200MWh project underway that it claimed is the country's largest. Where will redox flow battery energy storage be built?

From pv magazine Germany A redox flow battery energy storage facility with an output of 500 MW will be built in Switzerland. The development was announced by the company Flexbase, which said the project is being built in Laufenburg, a town on the Rhine that lies partly in Switzerland and partly in Germany.
