

Battery storage costs in the UK

Overview

How much does a solar battery storage system cost?

The total cost to install a solar battery storage system, including a 4kWh battery, inverter and PV system, comes in at around £12,000 on average. How long will a 10kW home battery last?

The average solar battery storage system lasts around 10 to 15 years. This is provided it's properly installed and well-maintained.

How much does a solar battery cost in the UK?

Currently, solar battery costs in the UK range between £920 and £12,900 depending on the chemical composition, life cycle, and storage capacity of the battery. A 5kWh battery costs around £4,600, a 9kWh one costs around £8,300, and a 14kWh battery costs around £12,900.

Can a solar battery save you money in the UK?

Your total savings with a solar battery in the UK depends on several factors, such as the size of the battery, the cost of electricity, and the electricity consumption habits of your household.

How much battery storage capacity does the UK have?

The UK's total battery storage project pipeline currently contains a total of 127GW of capacity. Figure 1 demonstrates the amount of capacity at each development stage as a proportion of the total pipeline. 8% of the capacity pipeline in the UK is operational or under construction, with 31% approved and yet to begin construction.
