

Beijing lithium iron phosphate battery energy storage container

Overview

What is China's new lithium iron phosphate battery energy storage?

China's Gotion High Tech has unveiled the latest generation of its lithium iron phosphate utility-scale battery energy storage products and mega-capacity cells, reflecting the industry trend towards packing more energy into the standard 20-foot container.

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

Why has Beijing added battery cathode material preparation technology to its restricted export list?

Beijing has added battery cathode material preparation technology to its restricted export list. The move affects lithium iron phosphate (LFP) and related technologies, requiring export licences to balance development and security.

What is the new lithium iron phosphate export restriction?

The move affects lithium iron phosphate (LFP) and related technologies, requiring export licences to balance development and security. The new restriction covers preparation technologies for battery cathode materials, including lithium iron phosphate, lithium manganese iron phosphate, and phosphate cathode raw materials.
