

Branded solar water pumps in Yemen

Overview

Can solar power pump water to communities?

For each project, UNICEF teams have provided and installed electric submersible pumps powered by a solar energy system. In total, over 700 solar panels are now helping to pump water to communities. Nawaf, 12, spends time every day fetching water on the back of his donkey from a far-away well.

How many solar panels are used to pump water to communities?

In total, over 700 solar panels are now helping to pump water to communities. Nawaf, 12, spends time every day fetching water on the back of his donkey from a far-away well. A pump used in the solarization project in Ibb governorate, Yemen.

What is UNICEF doing in Yemen?

With support from the UK's Foreign, Commonwealth & Development Office (FCDO), UNICEF has implemented the solarization of six rural water projects in Yemen in 2021, benefiting over 19,000 people. For each project, UNICEF teams have provided and installed electric submersible pumps powered by a solar energy system.

How does drought affect water supply in Yemen?

Fuel prices have skyrocketed since the conflict escalated in Yemen, and as diesel-powered water pumps cease to operate, drought has begun to affect the entire country. To reduce communities' reliance on fuel and provide sustainable water to local communities, UNICEF supports the solarization of water supply in Ibb and Al-Dale'e Governorates.
