

British Battery Energy Storage Projects

Overview

Are battery energy storage systems the UK's future?

The UK's energy landscape is undergoing an unprecedented transformation, with renewables supplying ever-more of our electricity and demand for electricity growing, which means an increased need for flexible storage assets like battery energy storage systems (BESS). But what battery assets does the UK boast currently?

.

Why is battery storage important in the UK?

As the UK intensifies its focus on decarbonising the electricity system, timely grid access for battery storage will be essential to support renewable energy integration, grid stability and meeting emission reduction targets. What is a lithium-ion battery storage project?

The electro-chemical battery storage project uses lithium-ion battery storage technology. The project was announced in 2020 and will be commissioned in 2024. The project is owned by Quinbrook Infrastructure Partners and developed by Wirsol Energy; Hive Energy.

Is there a battery storage pipeline in the UK?

In December 2024, EnergyPulse published our inaugural blog post summarising the battery storage pipeline in the UK. With RenewableUK's highly anticipated Future Energy System event just around the corner on 10 September, we thought it would be helpful to provide an update to the pipeline figures.
