

Brunei s environmental project uses 600kW collapsible containers

Overview

What type of waste is produced in Brunei?

The composition of waste in Brunei consists of almost 36% of food waste. A significant portion of waste, 55% (Paper, plastic, metal, glass, wood, and textiles), is recyclable waste 20. Oily waste accounts for a large part of the waste generated from industrial sectors.

How to manage solid waste in Brunei 2035?

We should move forward and implement integrated solid waste management, which agrees with the vision of Wawasan Brunei 2035 (Brunei Vision 2035) towards a quality life for the people. We must reduce its waste at the source to achieve such a goal. Thus, it is recommended that the authority develop the waste segregation act.

Who collects waste in Brunei Darussalam?

There are two government bodies: the Department of Environment, Park and Recreational (JASTRe), responsible for collecting waste in Brunei Darussalam, and the Municipal Department, responsible for collecting municipal waste in the municipal area 18. The composition of waste in Brunei consists of almost 36% of food waste.

What infrastructure projects have been completed in Brunei?

Recently, construction commenced on two significant infrastructure projects: Brunei's expansion project of Muara Port's container terminal and Chile's Rucalhue Hydropower Plant. Brunei's expansion project of Muara Port's container terminal
