Bucharest power ups uninterruptible power supply price

Overview

What is an uninterruptible power supply?

An uninterruptible power supply maintains power to servers and network devices, allowing for a safe shutdown or continuous operation during a power outage. For example, data centres use high-capacity industrial UPS systems to ensure their servers and cooling systems continue functioning seamlessly.

Where can I get an uninterruptible power supply (UPS)?

If you require an uninterruptible power supply (UPS batteries) in Toronto, Winnipeg, Brandon, Regina, or Edmonton, Prairie Battery is pleased to be of service. Most computers have a built-in APC/UPS unit so you won't lose your data should the power suddenly quit.

What is a standby UPS?

Standby UPS: A system where, normally, AC input (utility power) is connected to devices and when a power outage or abnormal voltage is detected, the inverter starts feeding the device using power from the batteries. In the event of a power outage, a few milliseconds of momentary break occur in AC output.

What is a Hybrid UPS?

Hybrid UPS: This system consists of three modes: double conversion mode, economy mode, and active filter mode. This type of UPS automatically selects the power feeding mode to best suit the power situation and load conditions.
