

Cambodia rooftop solar system

Overview

Two of the latest legislative and regulatory steps by the government are the Ministry of Mines and Energy's guidelines for rooftop solar systems, and most recently the long-awaited Environment and Natural Resources Code, which was enacted on June 29, 2023. When will rooftop solar power be allowed in Cambodia?

Notes to Editors: Principles for Permitting the Use of Rooftop Solar Power in Cambodia was presented by the Ministry of Mines and Energy (MME) in April 2023. It will form the basis of the forthcoming regulation, slated to be issued in early 2024.

Can solar power be used in Cambodia?

With more than 400 MW of utility-scale solar capacity currently installed, there is definitely space for both utility-scale and rooftop systems for Cambodia to fully reap the benefits of solar power.

Is solar power transforming remote communities in Cambodia?

Solar power is transforming remote communities in Cambodia with affordable, renewable energy and the chance to live more productive lives. However, hundreds of other villages remain off the grid, and energy experts say Cambodia should be doing more to harness the country's immense amount of untapped sunlight.

Where are solar power plants located in Cambodia?

Currently, solar power plants providing a total of 160 mW are located in Bavet city, Svay Rieng province, Kampong Speu province, and Kampong Chhnang province. Cambodia's existing solar power stations are already generating energy and linked to the grids.
