

# **Cape Town Generator Container BESS**

## Overview

---

What is Bess energy storage & how does it work?

BESS stores excess energy during high generation periods and releases it during low renewable output, ensuring continuous power supply. Integrating energy storage with renewables aids in reducing greenhouse gas emissions and promotes sustainable energy practices.

How much energy does a Bess site hold?

A BESS site with a capacity of 200 MW/800 MWh holds a substantial amount of stored energy. This is loadshedding?

equivalent to a single unit at Medupi Power Station running for an hour.

How many watts can a Bess battery store?

The BESS is available in 20ft or 40ft container sizes. The range includes: Battery & PCS (incl Transformer) with a storage capacity range of 0.5 – 3 MWh. Output power range between 0.25 – 1.5MW.

When will Bess Phase 1 be completed in South Africa?

As per the latest schedule, phase I is anticipated to be completed by end of year 2023. The BESS rollout has been scheduled for construction in the regions of the Western Cape, Eastern Cape, Northern Cape, and KwaZulu-Natal in South Africa.
