

# **China-Africa Communications solar container battery**

## Overview

---

Does China provide green energy to Africa?

The perspective is shared by Yang Baorong, a researcher at the China-Africa Institute, who said that China provides Africa with high-quality and affordable green energy technologies and products, making them accessible to more African people.

Does China have an Africa Solar Belt?

China's first major program under its new strategy of shifting overseas renewable energy investments toward smaller-scale initiatives is the Africa Solar Belt.

Has China built a solar power plant in Africa?

Yes, China has made strides in building solar power plants in Africa. For example, China's government financed the construction of a utility-scale 50 megawatt (MW) solar plant in Kenya — the first of its kind in the country.

What is China's advantage in supporting clean energy in Africa?

China is uniquely well positioned to support clean energy expansion and access in sub-Saharan Africa because it is home to more than 80% of the world's renewable energy manufacturing. This makes the country a good partner in Africa, as it is also Africa's largest bilateral trading partner and one of its biggest sources of foreign aid.
