

# China all in one solar system in New-Zealand

## Overview

---

How many solar power systems are there in New Zealand?

In August 2013, 1,403 grid-connected solar power systems were in operation in New Zealand and this number has grown to 25,431 as of October 2019. The steady uptake of grid connected solar power in New Zealand can be seen in the chart below. Roughly 4,000 solar power systems are installed every year in New Zealand.

Which Solar System is most popular in New Zealand?

Currently, 2 kW and 5 kW solar systems are the most popular in New Zealand. The number of installations in NZ will grow over time, as there is a need for new homes in the country, and the efficiency of solar equipment is improving. By 2050, the potential capacity for rooftop PV could be around 27 GW.

Can New Zealand benefit from China's 'green value chains'?

The report says New Zealand can benefit from China's role in 'green value chains', with several key green energy technologies – such as photovoltaics, used for solar panels, and rechargeable batteries – produced in the country.

Does China's mass manufacturing of solar panels create a 'overcapacity' problem?

China's mass manufacturing of solar panels has been seen by some as crucial to decarbonisation efforts, and by others as creating an 'overcapacity' problem. Photo: Getty Images
