

# **Communication 24v solar container lithium battery pack**

## Overview

---

What are 24V lithium ion batteries used for?

24V lithium ion batteries are used in a broad spectrum of applications, including: Electric vehicles, E-bikes, AGV (Automated Guided Vehicle), Golf Cart, Forklift, Medical devices (Advanced Medical Cart, Fingertip Pulse Oximeter, HeartStart Monitor/Defibrillators ). Lithium-ion 24V batteries are ready to be used.

What is the charge current of a 24V lithium-ion battery pack?

The 24V lithium-ion battery packs have a maximum charge current of 50A (0.5C). Maximum discharge current: 100A (1C) or higher.

Why does a battery pack need a BMS?

For Lithium Battery Packs containing many battery cells, since voltage and capacity of individual battery cells may not perform consistently, a Battery Management System (BMS) is necessary. It measures and controls voltage and current, and stops charging when the desired voltage is reached.
