

Container-mounted solar container lithium battery

Overview

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

What is a battery container?

UNISEG's Battery Container is designed for the safe and convenient storage and transportation of waste / used lead acid batteries (car & automotive).

What is battery energy storage system?

Battery Energy Storage System is very large batteries can store electricity from solar until it is needed, and can be paired with software that controls the charge and discharge.

What is a solar container?

Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility.
