## Overview

---

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

What is the energy storage Europe rebranding?

The European Association for Storage of Energy (EASE) today announced a rebranding to better reflect the rapid evolution of the energy storage role in the energy storage system. EASE will now be known as the Energy Storage Europe association, with a new identity designed to give the sector a stronger visibility.

What is energy storage Europe?

EASE will now be known as the Energy Storage Europe association, with a new identity designed to give the sector a stronger visibility. This transformation marks a significant milestone as the association approaches its 15<sup>th</sup> anniversary and reflects the central role that energy storage now plays in Europe's energy future.

How many residential energy storage systems are there in Germany?

By September 2023, Germany has installed more than 1 million residential energy storage systems and expects to add more than 400,000 units per year in the future. Volatile energy prices and the popularity of photovoltaic self-use have driven demand for residential energy storage, which is expected to continue to grow through 2030.
