

Cost of 20kW Solar-Powered Container Terminals at African Airports

Overview

Is a 20kW Solar System a good investment in South Africa?

Solar energy has become a popular choice for homeowners and businesses in South Africa, especially as the cost of solar systems has decreased in recent years. A 20KW solar system is a significant investment, and it's essential to have a comprehensive understanding of the costs and factors that affect the price.

How much does a 20kW Solar System cost?

On average, the cost of a 20KW solar system can range from 25000\$ to 30000\$. The price range includes the cost of the solar panels, inverter, installation, and other components. However, it's important to note that the price can vary depending on the location and the solar installer.

Does KZN airport have a solar PV contract?

For the KZN airport, the tender is for the installation of a 2,000kWp roof-mounted solar PV plant. The contract shall also include a maintenance contract for the works, priced separately, for a period of 5 years.

Why should you choose a solar plant contractor for Cape Town International Airport?

The solar plant technology is new to Cape Town International Airport and requires specialised maintenance procedures and monitoring equipment for efficient operations and analysis. The contractor is therefore expected to improve the efficiency of the associated assets and equipment on a regular basis.
