

Dutch cylindrical 32650 solar container lithium battery

Overview

What chemistry is a 32650 battery?

The 32650 battery is often available in Lithium Iron Phosphate (LiFePO₄) chemistry, which is a specialty of Redway Battery. LiFePO₄ batteries are renowned for their safety, longevity, and thermal stability compared to other lithium-ion chemistries.

What is a 32650 LiFePO₄ battery?

A 32650 LiFePO₄ battery refers to a specific type of lithium iron phosphate (LiFePO₄) battery in a cylindrical form factor with dimensions of 32mm in diameter and 65mm in height. These batteries are renowned for their safety, long lifespan, and efficient energy storage, making them ideal for various high-demand applications.

Why should you choose a 32650 battery?

High Energy Density: The 32650 battery offers a significant amount of energy in a compact form, making it ideal for applications where space is limited.

Long Cycle Life: With proper management, these batteries can last for thousands of cycles, providing excellent longevity compared to other battery types.

How long does a 32650 battery last?

With an 80% discharge rate, it can live up to 5000 life cycles without negatively affecting performance. 32650 battery size and weight are less than other cells. EPT is a leader in providing solutions for 32650 batteries. We are experts in researching, developing, manufacturing, and distributing rechargeable batteries.
