

Eastern European photovoltaic energy storage container 10kW

Overview

Is there a market for large-scale battery storage in Central Europe?

In many countries in Central Europe, the market for large-scale battery storage is growing rapidly. The drivers are diverse, but there are still obstacles, as Eliza Stefan, Sales Manager BESS for Central & Eastern Europe, Jinko EES, points out.

Where does SSE Renewables operate?

SSE Renewables operates across the United Kingdom, Ireland, Continental Europe, and Japan. ENGIE UK is a utility company and Independent Power Producer (IPP) specializing in renewable energy generation, flexible energy storage, and energy supply solutions for businesses.

How does Poland support large-scale battery storage?

Poland is also relying on capacity market auctions, but also on tax incentives, to promote large-scale battery storage. Up to 45% of project costs of utility-scale storage are covered by grants in Hungary, in addition to a CfD scheme and modern grid connection rules.

What is the future of energy storage?

Additionally, emerging technologies like thermal storage and flow batteries offer promising solutions for longer-duration storage. As renewable energy and storage technologies continue to evolve, their synergy will strengthen, enhancing the resilience, flexibility, and sustainability of the electricity system.
