

# Energy company uses 50kW solar-powered container in Stockholm

## Overview

---

How does Sweden use energy?

In Stockholm, the body heat from commuters passing through Stockholm Central Station is used to heat a nearby building, and in the southern town of Växjö, there are passive high-rises. More than half of the energy used in Sweden comes from renewable energy sources. Find out more about Sweden's energy use.

What is the largest source of bioenergy in Sweden?

The largest source of bioenergy in Sweden is the forest. Sweden has more forest than most other countries – 69 per cent of the land area. Bioenergy is primarily used for heating – both in private homes and in district heating – as well as for electricity production and for industrial processes.

Does Sweden have a nuclear power plant?

Sweden currently has three nuclear plants with six nuclear reactors in operation. In 2023, some 14 per cent of Sweden's electricity came from wind power. Combined heat and power (CHP) plants – mainly powered by biofuels – accounted for around 10 per cent of the electricity output. Sweden is wise to draw energy from the forest. There's lots of it!.

Does Sweden have a heat pump?

The number of heat pumps in Sweden has increased dramatically since the 1990s, which has contributed to less energy being used for heating and hot water in buildings. Ethanol research began in the 1980s, and Sweden has been among the world leaders in this field.
