Energy storage base station construction party

Overview

What is the largest grid-forming energy storage station in China?

This marks the completion and operation of the largest grid-forming energy storage station in China. The photo shows the energy storage station supporting the Ningdong Composite Photovoltaic Base Project. This energy storage station is one of the first batch of projects supporting the 100 GW large-scale wind and photovoltaic bases nationwide.

What is the 'Special Action Plan' for new energy storage?

The 'Special action plan for large-scale construction of new energy storage (2025-2027)' was published last Friday (12 September), formulated jointly by the country's National Development and Reform Commission and National Energy Administration (NEA).

What are the advantages of a new-type energy storage station?

With advantages like fast responding, flexible deployment and a short construction period, the new-type energy storage station can accurately match the grid to different load requirements and help connect unstable clean energy to the power grid.

Where is the largest energy storage station in China?

The Baotang energy storage station in Foshan, South China's Guangdong Province, the largest of its kind in the Guangdong-Hong Kong-Macao Greater Bay Area (GBA), is now in operation. It is the largest grid-side individual energy storage station built in one continuous construction period.
