

# Energy storage container lithium iron battery

## Overview

---

What is a containerized battery energy storage system?

Our's Containerized Battery Energy Storage Systems (BESS) offer a streamlined, modular approach to energy storage. Packaged in ISO-certified containers, our Containerized BESS are quickly deployable, reducing installation time and minimizing disruption.

What is a 5 MWh containerized liquid-cooled battery energy storage system?

Recently in June this year, the company launched its 5 MWh containerized liquid-cooled BESS adhering to the highest safety standards and performance levels. It employs 315 Ah LFP battery cells, also sourced from AESC. Envision Energy has launched a advanced 5 MWh containerized liquid-cooled battery energy storage system (BESS).

How much does an energy storage system weigh?

All in, the system weighs about 55 tons (50 tonnes) To put it into simple terms, at 1,500 volts DC, it could theoretically power an average US home at 1 kW continuously for about 640 hours – a few hours shy of 27 days. Not that this energy storage system is designed for such a thing.

How much does a lithium ion battery weigh?

As per media reports, the battery system weighs about 55 tons. The system is liquid-cooled, and has a voltage range of 1500-2000 Volts. It is configurable to offer a storage backup of two to eight hours, depending on the customer's requirements.

## Energy storage container lithium iron battery
