# Energy storage container rolls off production line in Xiao

## Overview

---

What happened to Wanxiang A123 energy storage cores?

On the morning of July 18, the first batch of 300Ah aluminum-shelled energy storage cores of Wanxiang A123 rolled off the production line in No. 5 plant, marking the company's leapfrog transformation from soft-packed cores to aluminum-shelled energy storage cores.

Which energy storage systems dominate China?

In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. Image: Getty Images/iStockphoto In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023.

What is the future of energy storage in China?

Image: Getty Images/iStockphoto In China, generation-side and grid-side energy storage dominate, making up 97% of newly deployed energy storage capacity in 2023. 2023 was a breakthrough year for industrial and commercial energy storage in China. Projections show significant growth for the future.

Is the industrial energy storage sector at a crossroads?

Have you read?

The industrial energy storage sector is currently at a crossroads, facing both challenges and promising opportunities. On the one hand, the market potential is vast, with an increasing number of industrial users recognizing the importance of energy storage and showing a growing willingness to install storage systems.
