

# **Energy storage solar container lithium battery 1gwh**

## Overview

---

What is the containerized lithium battery energy storage system?

The containerized lithium battery energy storage system is based on a 40-foot standard container, and the lithium iron phosphate battery system, PCS, BMS, EMS, air conditioning system, fire protection system, power distribution system, etc. are gathered in a special box to achieve high integration.

How many MWh can a container hold?

Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 – 2.9 MWh per container to meet all levels of energy storage demands. Optimized price performance for every usage scenario: customized design to offer both competitive up-front cost and lowest cost-of-ownership.

What is a microgreen containerized energy storage solution?

The core technology used in Microgreen containerized energy storage solutions are top quality Lithium Ferrous Phosphate (LFP) cells from CATL. CATL's 280Ah LiFePO<sub>4</sub> (LFP) cell is the safest and most stable chemistry among all types of lithium ion batteries, while achieving 6,000 charging cycles or more. CATL serves global automotive OEMs.

What is the capacity of a CATL battery?

CATL serves global automotive OEMs. It is the global volume leader among Tier 1 lithium battery suppliers with plant capacity of 77 GWh (year-end 2019 data). Range of MWh: we offer 20, 30 and 40-foot container sizes to provide an energy capacity range of 1.0 – 2.9 MWh per container to meet all levels of energy storage demands.
