

# Financing for the Bern Solar Container 1MWh Project

## Overview

---

What is a containerised energy storage system (BESS)?

They can be configured to match the required power and capacity requirements of client's application. Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various storage technologies and for different purposes.

How much does a solar energy storage system cost?

PVMars lists the costs of 1mwh-3mwh energy storage system (ESS) with solar here (lithium battery design). The price unit is each watt/hour, total price is calculated as:  $0.2 \text{ US\$} * 2000,000 \text{ Wh} = 400,000 \text{ US\$}$ . When solar modules are added, what are the costs and plans for the entire energy storage system?

How many solar panels should a 1MWh energy storage system have?

Therefore, PVMARS recommends that a 1MWh energy storage system be equipped with 500kW solar panels, and the calculation is as follows: You have a 550W solar panel and average about 4 hours of sunlight per day. It is also necessary to increase the power generation capacity by about 1MWh to supply residents' electrical loads during the day.
