

# **Full set of solar street light system**

## Overview

---

What is a solar street light?

All in one solar street lights integrate a monocrystalline solar panel, Phillips 5050 LED chips, and a long life LiFePo4 battery into a compact, reliable, and extremely bright package. This solar all in one street light, and solar parking lot light is an alternative to traditional solar lighting system design.

How to design a solar street light?

1. Solar Street Lighting Demand Design Formula:  $P_{LED} = E \times A / (\eta \times U \times K)$   
Example: Road width 6m, distance between lights 25m, target illuminance 20 lx →  $P_{LED} = 20 \times (6 \times 25) / (0.85 \times 0.5 \times 0.75) = 20 \times 150 / 0.32 \approx 94W$  → Choose a 100W LED module (Luminous flux 15,000 lm)  
2. Solar Street Light Photovoltaic System Capacity Calculation Steps: 3.

Are solar street lights a good choice?

SOLTECH solar street lights provides reliable lighting while meeting the governmental lighting requirements for public areas. By consuming no electricity and using smart power technology, our commercial solar street lights avoid the installation cost of standard grid-powered lights, lasts longer and delivers a better lighting result.

What is smart IoT solar street light system?

Smart iot solar street light system for option, especially designed structure foreasy extension of the lamp size. The TS Series 80W/100W 30 ALL-IN-ONE Solar Street Light features a modern design, COB/SMD LED options, gemstone lenses for wider angles & higher transparency, and easy lamp size extension.
