

Georgia 12v ups uninterruptible power supply

Overview

What is a UPS (uninterruptible power supply)?

A UPS (uninterruptible power supply) sits between an alternative source of power – such as a standby diesel generator – and protected loads.

What is a 12V uninterruptible power supply?

This is a simple and fully automatic, 12V uninterruptible power supply system for small/medium power appliances. This power supply specifically designs to drive routers and modems to provide uninterrupted internet and telephone services in areas affected by frequent power failures.

Does the mini ups need additional products for Operation?

This product needs further products for operation. Mandatory accessories The MINI UPS modules with integrated power supply are particularly space-saving: UPS module and power supply in one housing.

How many battery modules are required to complete the UPS system?

Only one battery module is required to complete the UPS system. Battery modules with lead AGM technology enable buffer times of up to 2 hours under nominal load for output voltages of 24 V DC or 12 V DC. Power loss nominal load max. Conductor cross-section, rigid max. Conductor cross-section flexible max. Conductor cross-section AWG max.
