

Georgia Solar Base Station Quotation

Overview

What type of energy does Georgia Power use?

Committed to delivering clean, safe, reliable and affordable energy, Georgia Power maintains a diverse, innovative generation mix that includes nuclear, coal and natural gas, as well as renewables such as solar, hydroelectric and wind.

Where will solar power be installed in Georgia?

The facilities will be located throughout Georgia and include: Mitchell County: A 25-year PPA providing 260 MW of solar capacity. Coffee County: A 30-year PPA providing 200 MW of solar capacity. Wilkinson County: A 20-year PPA providing 183 MW of solar capacity paired with a 91.5 MW battery storage system.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

.

How much do solar panels cost in Georgia?

As of October 2024, the average solar panel system costs \$2.63/W including installation in Georgia. For a 5 kW installation, this comes out to about \$13,173 before incentives, though prices range from \$11,197 to \$15,149. After the federal tax credit, the average price drops by 30%. You'll probably pay even less than what we show here.
