

High-Efficiency Alternative Solution for Foldable Containers in Wastewater Treatment Plants

Overview

What is a containerized wastewater treatment plant?

A containerized wastewater treatment plant is a wastewater treatment system that is fully integrated into a container. For uncomplicated and fast transportation, we use 10, 20 and 40-foot shipping containers in accordance with the international ISO standard for our KLARO container systems.

What is a containerised portable sewage treatment plant?

A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable wastewater volumes to achieve any effluent quality.

What is an intelligent containerised waste water treatment plant?

Intelligent containerised waste water treatment plants are ready to use immediately on delivery. A containerised portable waste water treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary.

What is a containerized package plant?

Containerized package plants offer a portable, plug-and-play solution for water and wastewater treatment. They are ideal for remote locations, emergency response, or temporary needs, providing flexibility and convenience without compromising on treatment quality.
