How is the solar panel business going

Overview

China and the US may be reducing policy support for the solar power sector, but Goldman Sachs Research still expects rapid growth, with solar installations set to rise by 57% between 2024 and 2030. What is the global solar PV panels market size?

The global solar PV panels market size was estimated at USD 170.25 billion in 2023 and is projected to reach USD 287.13 billion by 2030, growing at a compound annual growth rate (CAGR) of 7.7% from 2024 to 2030.

How has the residential solar market changed in 2024?

Declines in residential solar markets have been a hit to the industry—but its foundation is strong. Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined.

What is the global solar power market size?

Our premium consulting services are available for an additional fee and is designed to help you gain a competitive edge. The global solar power market size was valued at USD 253.69 billion in 2023 and is projected to be worth USD 273 billion in 2024 and reach USD 436.36 billion by 2032, exhibiting a CAGR of 6% during the forecast period.

What will drive the growth of solar PV panels industry?

Growing demand for renewables-based clean electricity coupled with government policies, tax rebates, and incentives to install solar panels is expected to drive the growth of solar PV panels industry in the coming years. Asia Pacific held the largest market share of over 54.0% in 2023.
