

How much does it cost to add solar panels to a power station

Overview

How much does it cost to install new solar panels?

Unfortunately, there is no one-size-fits-all answer to what adding new panels will cost, but in general, you can expect it to be around the same average cost to install solar, about \$3.00 per watt. The following table outlines an estimated cost for installing additional solar panels to your existing system: *Assumes 400-watt panels.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt.^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

Should I add solar panels to my existing system?

If you add solar panels to an existing system, you can increase your solar electricity generation, extend the life of your installation, and create further savings on utility energy costs.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.
