

How to open the lead-acid battery cabinet

Overview

On the 1000 mm wide classic battery cabinet, remove two screws to open the left door. Lockout/Tagout the battery breaker in the OFF (open) position. Remove the breaker protection plates. How do you store a lead acid battery?

Store lead acid batteries in a ventilated area at 50°F–80°F (10°C–27°C). Ensure they're charged to 50–70% capacity before storage. Check voltage monthly and recharge if below 12.4V. Keep terminals clean and coated with anti-corrosion gel. Use non-conductive racks to prevent short-circuiting and avoid stacking batteries unless designed for it.

How do I dispose of lead acid batteries?

Do not dispose of lead acid batteries except through channels in accordance with local, state and federal regulations. This manual contains important instructions for Flooded Lead-Acid Battery Systems that should be followed during the installation and maintenance of the battery system.

Are lead acid batteries safe?

“Lead acid batteries remain dominant in automotive and backup systems due to their fault tolerance and recyclability. However, improper storage accounts for 68% of premature failures. Always prioritize state-of-charge monitoring—voltage below 12.2V triggers irreversible sulfation.

Do flooded lead-acid batteries need maintenance?

Proper maintenance to the battery system of this unit must be done by a qualified service technician. This is essential to the safety and reliability of your power supply system. EnerSys flooded lead-acid batteries set the benchmark for reliability and durability in flooded lead-acid batteries and battery systems.
