

# How to use the container wind power base station in Mauritius

## Overview

---

Will a new wind energy system deliver green electricity to Mauritius?

A new and innovative form of wind power will soon deliver green electricity to the Republic of Mauritius. Mauritian-based company IBL Energy Holdings Ltd. and German SkySails Power GmbH have agreed on the installation of an airborne wind energy system.

Will airborne wind power help Mauritius achieve 40% renewables?

The Republic of Mauritius is targeting a 40% share of renewables in its electricity mix by 2030. Thanks to its specific advantages, airborne wind energy is set to play a vital role in achieving this objective.

How does SkySails pn-14 work in Mauritius?

The project in Mauritius not only contributes renewable energy to the grid but also serves as an innovation lab to monitor the long-term performance of the SkySails PN-14 system in the island's specific climate. The data is used to improve the system's performance and quality for future installations.

Does Mauritius have a sustainable future?

Mauritius, located in the heart of the Indian Ocean, is emerging as a symbol of resilience and innovation. With ambitious climate goals and a commitment to energy independence, this island nation is advancing toward a sustainable future.
