

Is Boston LG solar container lithium battery cylindrical

Overview

When did LG start developing lithium-ion batteries?

LG Energy Solution began its research on lithium-ion batteries in 1992. It launched the development of lithium-ion batteries in 1996 and entered into the battery market with the first mass-production of laptop batteries in 1999. Batteries have been adopted for a variety of applications ever since.

What battery size does LG Energy Solution offer?

LG Energy Solution has increased the battery sizes and is currently developing the 46-series battery. The 46-series offers 46 mm in diameter and a wide range of height (80 mm – 120 mm), further expanding the application of cylindrical batteries. * LEV: Light Electric Vehicles. They include electric bikes, scooters, and wheelchairs.

Are LG Energy Solution batteries safe?

The addition of LG Energy Solution's cylindrical batteries offers superior performance and safety. To ensure safety, the batteries utilize high-quality NCMA cathodes enhanced with aluminum and LG Energy Solution's proprietary SRS® (Safety Reinforced Separator) with a ceramic coating.

Why is LG preparing a mass-production of the 46-series battery cells?

All eyes of global finished car manufacturers and battery makers are on the 46-series, the new standard of cylindrical batteries. In response, LG Energy Solution is proactively preparing mass-production of the 46-series battery cells. The 46-series can resolve major disadvantages of its predecessors.
