

Japan Energy Storage Power Station

Overview

How big is Japan's energy storage capacity?

Global energy storage capacity was estimated to have reached 36,735MW by the end of 2022 and is forecasted to grow to 353,880MW by 2030. Japan had 1,671MW of capacity in 2022 and this is expected to rise to 10,074MW by 2030. Listed below are the five largest energy storage projects by capacity in Japan, according to GlobalData's power database.

What is Japan's first energy storage project?

In 2015, we started Japan's first demonstration project covering energy storage connected to the power grid in the Koshikishima, Satsumasendai City, Kagoshima. This project is still operating in a stable manner today. One feature of our grid energy storage system is that it utilizes reused batteries from EVs.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

Japan Energy Storage Power Station

[Nippon Chikudenchi commissions ...](#)

2 days ago · The 2MW/8MWh Kasugai Nishio Power Storage Station in Kasugai City, Aichi Prefecture, will be aggregated by Digital Grid, which ...

[Nippon Chikudenchi commissions 2MW/8MWh Kasugai Nishio Power Storage](#)

2 days ago · The 2MW/8MWh Kasugai Nishio Power Storage Station in Kasugai City, Aichi Prefecture, will be aggregated by Digital Grid, which will trade the asset's power in the ...
