What is a hybrid solar power system?

Hybrid system. Off-grid solar power systems are useful for remote places with no access to electrical points. They're also paired with generator sets, with the solar power system supplying electricity during the day while the generator set takes over at night (hybrid system). Hybrid systems are popular at islands or beaches too.

Can off-grid solar be used on remote islands?

While at remote islands with no access to the grid, off-grid solar is sometimes paired with a diesel generator to create a "hybrid" system that can help reduce intermittent power cuts and stabilise power around the island. We'd like to draw your attention to some of the best use cases for off-grid solar below: Off-grid homes.
