

# **Lithium banned in Tiraspol energy storage facility**

## Overview

---

Are large lithium-ion-based power banks a fire risk?

Large lithium-ion-based power banks (BESS) are starting to become a large part of green energy solutions everywhere when energy is harvested through solar or wind. However, there are fire risks and public fear and opposition against large BESS installations near residential areas appears to be growing.

Are large lithium-ion-based power banks a threat to green energy?

Large lithium-ion-based power banks are starting to become a large part of the green energy solutions everywhere energy is harvested through sun or wind. However, there are fire risks and public fear and opposition against large BESS is growing.

Should lithium-ion batteries be placed in residential or school communities?

Placing a large, sophisticated machine, filled with potentially explosive lithium-ion batteries, in residential or school communities is unacceptable.

Are lithium-ion battery energy storage systems getting bigger?

Despite the fire hazards of lithium-ion: Battery Energy Storage Systems are getting larger and larger, which CTIF.org wrote about on August 8, 2023: Moss Landing (Photo above) in California is now the world's biggest battery storage project at 3GWh capacity. China is also building large lithium-ion battery energy storage facilities.
